2 Introduction: we human ^{& animals} live in biosphere of
~~the~~ earth. human's & domesticated animal
are interdependent on each other for various
need food, biofuel, Labour.

body: Interconnection

Use data & example to
prove the
point

① we human use animal as food if animal's
health affected we will get ~~dis~~ disease contaminated
food which will affect our's health to

② unfortunately if animal's health affected by
any virus like H1N1. which will mutate it self
& Adapted to human host & spread in the
human.

③ environmental factor like temperature, pressure,
humidity, rain water will affect the reproduction
multiplication, mutation of various micro-organisms
like virus, protozoa, fungi, bacteria.

④ if environmental health decrease by ^{any} human or
natural activity. the environmental factor's param
eter

changes. any one type of animal in food cycle become dominant which will reduce their prey complete end of any species of animal which start the chain reaction as result will end all species in the food cycle.

⑤ human's Animal's & environment's health is interconnected. we all has one health.

Examples of Viral zoonotic diseases:-

① H1N1 virus cause bird flu go too human in 2004.

Conclusion- Since, we have one health, i.e. biosphere's health that we human as a most dominant species on earth has to maintain. by preserving All the nature's cycles like water cycle, food cycle, ^{chain} Just like our economical cycle.
